

## How do I clean a QUARE Podium Bathtub and totem pole?

It should be cleaned with water after each use. It is essential to ventilate the bathroom every day to ensure good ventilation.

Our **Bathtubs and Podium totems** are Q-TEK (Solid Surface) products.

### **Cleaning is EASY, SIMPLE and ECO-FRIENDLY:**

- Use a clean, damp, non-abrasive sponge to scrub the entire surface, then rinse thoroughly,
- We recommend simply using water and:
  - Liquid detergent or soap (ideally pH neutral soap).
  - The white "magic" sponge. (Also used to clean pool liners).
  - White vinegar for domestic use (3 cups of white vinegar diluted in half a liter of water). Leave to act for 30 minutes.
  - Less ecological: Specific anti-scale products for domestic use. Leave to act for 10 to 15 minutes.

For cleaning, it is NOT RECOMMENDED to use aggressive chemicals such as acetone, trichloroethylene, strong acids (muriatic acid ...) as well as strong bases (caustic soda ...), industrial detergents and solvents used in the paint industry. For further information, please refer to the enclosed instructions for care and maintenance of the product.

- DO NOT use metal scrapers, iron brushes or other metallic household tools to remove stains, paint, putty, etc.
- Some substances such as ink, cosmetics and dyes, if they remain in contact with the surface of the Bathtub for a long time, can stain the material; the same can happen with lit cigarettes.
