

How to clean a QUARE product?

It should be cleaned with water after each use. It is essential to ventilate the bathroom every day to ensure good ventilation.

Our **product** are made of QUAREX: Resin+ mineral fillers+ coating.

Cleaning is EASY, SIMPLE and ECOLOGICAL:

- Use a clean, damp, non-abrasive sponge to scrub the entire surface, then rinse thoroughly,
- We recommend simply using water and:
 - Liquid detergent or soap (ideally pH neutral soap).
 - The "magic" white sponge. (Also used to clean pool liners).
 - White vinegar for domestic use (3 cups of white vinegar diluted in half a liter of water). Leave to act for 30 minutes.
 - Less ecological: Specific anti-scale products for domestic use. Leave to act for 10 to 15 minutes.

The Drain cover should also be cleaned periodically to avoid soap, dirt and limescale residues. To do this, remove it from the tray and clean it with a specific product for stainless steel (liquid detergent works perfectly well).

- Do not use abrasive chemicals, acids, alkalis, solvents or abrasive sponges such as Scotch Brite (green side).
